Nidhal Abdelmalek, Fayçal Djeffal, Toufik Bentrcia

H. Ferhati, F. Djeffal, K. Kacha.

**Optimizing the optical performance of ZnO/Si-based solar cell using metallic nanoparticles and interface texturization.** Optik - International Journal for Light and Electron Optics, Volume 153, January 2018, Pages 43-49

Toufik Bentrcia, Fayçal Djeffal, Elasaad Chebaki, Djemai Arar

Toufik Bentrcia; Fayçal Djeffal; Elasaad Chebaki

Toufik Bentrcia, Fayçal Djeffal, Djemai Arar and Elasaad Chebaki

Improved Reliability Performance of Junctionless Nanoscale DG MOSFET with Graded Channel Doping Engineering. physica status solidi (c) Special Issue: Volume 14, Issue 10, October 2017

H. Ferhati, F. Djeffal.

H. Ferhati, F. Djeffal, F. Srairi.

F. Srairi, F. Djeffal, H. Ferhati.

E. Chebaki, F. Djeffal, H. Ferhati, T. Bentrcia.

Improved analog/RF performance of double gate junctionless MOSFET using both gate material engineering and drain/source extensions. Superlattices and Microstructures, Volume 92, April 2016, Pages 80–91.

H. Bencherif, F. Djeffal, H. Ferhati.

H. Ferhati, F. Djeffal.

F. Djeffal, H. Ferhati, T. Bentricia

Improved analog and RF performances of gate-all-around junctionless MOSFET with drain and source extensions. Superlattices and Microstructures Volume 90, February 2016, Pages 132–140

T. Bentricia, F. Djeffal, E. Chebaki, D. Arar

Impact of the drain and source extensions on nanoscale Double-Gate Junctionless MOSFET analog and RF performances. Materials Science in Semiconductor Processing Volume 42, Part 2, February 2016, Pages 264–267

F. Djeffal, H. Ferhati

A new high-performance phototransistor design based on both surface texturization and graded gate doping engineering. Journal of Computational Electronics Volume 15, Issue 1, pp 301–310

H. Ferhati, F. Djeffal

Djemai Arar, Fayçal Djeffal, Toufik Bentrcia, Mohamed Chahdi

N. Abdelmalek, F. Djeffal, M. Meguellati, T. Bendib

K. Kacha, F. Djeffal, T. Bentrcia, D. Arar, M. Meguellati, M. Chahdi

T. Bentrcia, F. Djeffal, E. Chebaaki

F. Djeffal, N. Lakhdar

T. Bentrcia, F. Djeffal, M. Chahdi

An analytical two dimensional subthreshold behavior model to study the nanoscale GCGS DG Si MOSFET including interfacial trap effects. Microelectronics Reliability Available, volume 53, Issue 4, April
T.Bentrcia, **F. Djeffal** and E. Chebaaki

**ANFIS-based approach to studying subthreshold behavior including the traps effect for nanoscale thin-film DG MOSFETs**. Journal of Semiconductors, vol. 34, pp. 044003, 2013

---

**F. Djeffal**, T. Bendib, D. Arar, Z. Dibi

**An optimized metal grid design to improve the solar cell performance under solar concentration using multiobjective computation**. Materials Science and Engineering: B, Volume 178, Issue 9, 15 May 2013, Pages 574–579

---

M. Meguellati, **F. Djeffal**

F. Djeffal, A. Ferdi and M. Chahdi

T. Bendib, F. Djeffal, D. Arar, Z. Dibi and A. Ferdi

Fuzzy-logic-based approach to study the electrons mobility in nanoscale Double Gate MOSFETs. Materials Science and Engineering Volume 41, 2012.

F. Djeffal, T. Bendib

T. Bendib, F. Djeffal and D. Arar

Subthreshold behavior optimization of nanoscale Graded Channel Gate Stack Double Gate (GCGSDG) MOSFET using multi-objective genetic algorithms. Journal of Computational Electronics, available on line 19 February
F. Djeffal, T. Bendib, M. Abdi

T. Bendib, F. Djeffal, M. Meguellati, A. Benhaya and M. Chahdi

A Compact drain current model based on genetic algorithm computation to study the nanoscale double-gate MOSFETs. Semiconductor Physics, Quantum Electronic & Optoelectronic, 2009, vol12 n°1.p 27-30

F. Djeffal, T. Bendib, N. Lakhdar, R. Benzid, A. Benhaya

F. Djeffal, D. Arar, N. Lakhdar, T. Bendib, Z. Dibi, M. Chahdi

F. Djeffal, N. Lakhdar and T. Bendib

F. Djeffal, M.A. Abdi, Z. Dibi, M. Chahdi and A. Benhaya

A neural approach to study the scaling Capability of the undoped Double-Gate and cylindrical Gate All around MOSFETs. Materials Sciences & Engineering B, p.239-244, 2008. (Publisher: Elsevier).

F. Djeffal, S. Guessasma, A. Benhaya and M. Chahdi

A neural computation to study the scaling Scaling capability of the undoped DG MOSFET, accepted for publication in J.Semiconductor Physics, Quantum Electronics and Optoelectronics in 03.November, 2007. (Publisher: Institute of Semiconductor Physics, ISP).
F. Djeffal, M. Chahdi, A. Benhaya, M. L. Hafiane

F. Djeffal, M. Chahdi

F. Djeffal, A. Benhaya and M. Chahdi

F. Djeffal, S. Guessasma, A. Benhaya and M. Chahdi

F. Djeffal, M. Meguellati, A. Benhaya and M. Chahdi

A compact Subthreshold Swing model including bulk traps effects to study the scalability limits of double-gate MOSFETS, paper submitted to Journal of Semicond. Sci. Technol.
